The Professional's Choice

March 2018

Many of Today's Late Model Vehicles Recommend Replacing the Timing Belt at 100,000 Miles at a Cost That Often Exceeds \$1,000

Protect Your Repair Cost with IronTite Thoro-Flush & All Weather Seal

Many of today's late model vehicle have engines with overhead cam/valve designs that recommend replacing the timing belt at 100,000 miles. This is a complex job which often requires a lot of time and special tools. As a result, the average cost can easily exceed \$1,000* (including labor).

Note: It is recommended that timing belt driven water pumps should always be replaced at the same time as the timing belt to reduce warranties, customer comebacks, and preserve long-term system performance. That's why many aftermarket brands sell timing belt kits which include the water pump.

Why You Should Up-sell These Products with Every Timing Belt Replacement

Thoro-Flush COOLANT SYSTEM FLUSH

- Opens and cleans out plugged heater cores
- Clears out gelled Dex-Cool with a simple flush
- Diesel Oil cooler failure, cleans cooling system in single flush
- Safe for use on cast iron, aluminum, brass and plastic
- For improved coolant flow and temperature control, always flush with Thoro-Flush for the best possible results
- Thoro-Flush is a concentrated powder and the most powerful flush available

Part No. 488-9110-16

All Weather Seal STOPS COOLANT LEAKS

- Pour-and-Go Formula does not require flushing of coolant mixture
- Stops Coolant Leaks in Minutes
- Stops Head/Intake gasket, radiator and other coolant system leaks
- Permanently blends with all coolants / antifreezes to stop existing and future leaks
- Will not clog heater cores
- Micro fibers detect and stop leaks at their source
- Formulated to work in the most extreme weather conditions, HOT or COLD

Part No. 488-9130-16
